

CHIEF[®]
AGRI

TRUSTED. TESTED. TRUE.

**THE ULTIMATE
FIELD GUIDE
QUALITY GRAIN MANAGEMENT**

Chief Agri originated in 1961 and has grown to offer a full line of grain and commodity storage, aeration, and material handling products throughout the world.

The success of our company is directly attributed to the strong relationships we have created with our customers. Listening to client needs has led to innovative products that help producers minimize storage costs, protect the quality of their product, and maximize the selling price of their commodities.

Taking care of our customers is our top priority and we take pride in engineering unparalleled personal attention to our customers by offering dependable service and products built to last.

"The success of Chief Industries is largely because of the dedicated people —past and present — who built their careers at Chief, and helped Chief build lasting relationships with customers and suppliers around the world. We take incredible pride with how we treat all of our stakeholders. The experience, dedication and passion of our people here at Chief, in meeting the needs of these stakeholders, is second to none. I couldn't be more proud of our group, with their understanding of how important it is that we live by our mission statement each and every day."

-DJ Eihusen, CEO, Chairman of the Board, President

GRAIN STORAGE

DIVERSE SOLUTIONS

UNPARALLELED STRENGTH AND DURABILITY

Discover the precision and reliability of Chief bins (silos), meticulously engineered to deliver exceptional strength, cost-effective material usage, seamless installation, and optimal grain protection. When you choose a Chief bin (silo), you're not just acquiring storage; you're securing a tailored solution for your unique grain handling requirements, backed by service that ensures your complete satisfaction.

Chief's bin (silo) design stands out for its unmatched strength and durability, precisely catering to your specific grain storage needs. Our dedicated Chief representative is ready to assist you in selecting the ideal bins (silos) for your requirements, ensuring they are expertly constructed and available when you need them. Experience the assurance of quality and performance with Chief bins (silos).

Precision Engineered for outstanding performance!

FARM BINS (SILOS)

Durable grain storage systems in sizes ideal for the farm.

LEMANCO MODULAR BIN SYSTEMS

For the storage and gravity retrieval of dry bulk materials.

COMMERCIAL BINS (SILOS)

Heavy-duty commercial roof designs customized for your operation.

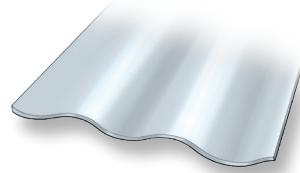

HOPPER TANKS

Get long-term reliability with high quality materials and unparalleled strength.

STEEL SIDEWALL SYSTEM

Chief produces high quality corrugated sidewalls to provide optimum grain protection.

- Our corrugated steel sidewalls are of high quality 20 through 8 gauge galvanized steel with a minimum tensile strength of 70 ksi (483 MPa) for increased load capacities.
- The 4.714" (11.97 cm) peak-to-peak corrugation of the sidewalls is $\frac{3}{4}$ " (1.905 cm) wider than those of the closest competition, reducing the chance for material to collect on the inner walls.
- Chief's 42.4" (107.7 cm) sidewall sections require fewer rings and seams than the 32" (81.28 cm) sidewall sections of alternative bins (silos). This reduces costly installation time.
- The sidewall steel has a standard G115 (350g/m²) galvanized coating that provides over 28% more corrosion resistance than the G90 (275g/m²) industry standard. Optional upgrade to G210 (610g/m²) galvanized steel available.

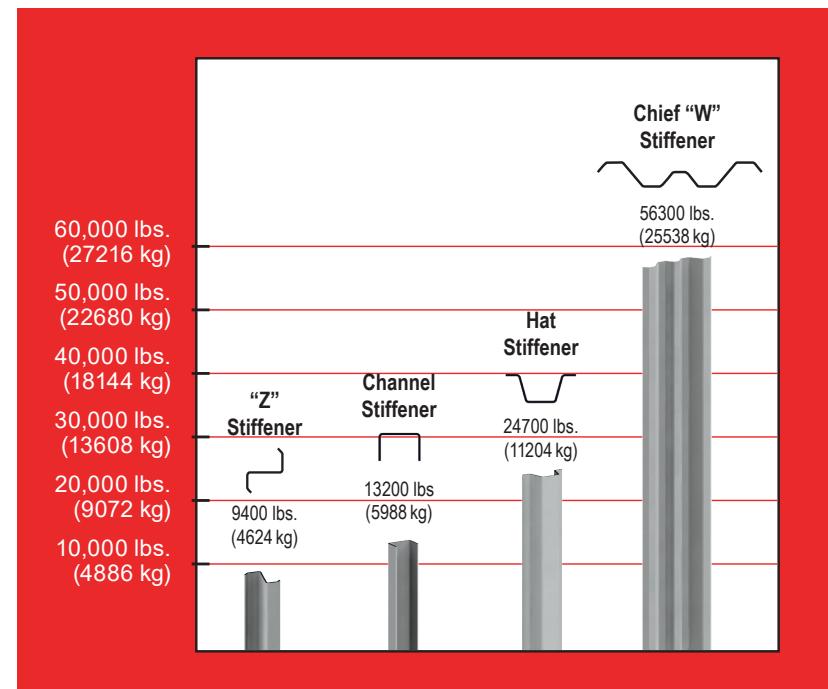

- The unique corrugation has a hill-and-valley bolting system using larger grade-8 bolts with conical sealing washers and serrated flange nuts. Chief uses the strongest bolts in the industry, giving Chief bins (silos) additional strength to better handle larger vertical load capacities and taller sidewall heights.

Reduced Assembly Time

Chief's unique 42.4" (107.7 cm) sidewall sections require fewer rings and seams than the 32" (81.28 cm) sidewall sections of competing bins (silos). When combined with our exclusive "W" stiffener, Chief bins (silos) offer unsurpassed strength while reducing costly assembly time.

PRECISION ENGINEERED FOR OUTSTANDING STRENGTH

Chief "W" stiffeners lead the competition in strength.

Chief Stiffened bins (silos) feature exclusive exterior "W" stiffeners that are designed to bear almost twice the weight of competitor stiffener designs. Designed to support the vertical load, the "W" stiffener system provides additional strength, allowing sidewall heights to exceed 100 feet (30.48 m). Combined with our high strength roof design they enable our bins to easily support overhead catwalks and conveyors.

End-to-end connections provide positive load transfer down the stiffener column, eliminating complex shear-load splicing. Unique "W" stiffeners on the bin's exterior help prevent grain from accumulating on the inside walls.

Anchor system provides solid base

Chief's positive anchor design ties the sidewall solidly to the foundation to allow for singlepass sweeps. This also provides strong resistance to lateral movement and uplift.

Chief's door systems make maintenance easier.

Chief offers one-ring double-portal frame doors or two-ring walk-thru doors. The door frames are hot-dip galvanized for superior corrosion resistance. Both have an easy latch system to provide unobstructed entry without requiring the removal of cross ties, tie rods, or tie bars.

One-Ring Doors

One-ring frame doors measure a generous 26" (.66m) wide by 38" (.96m) tall. (Standard for stiffened bins.)

Two-Ring Doors

Chief's large 'easy-walk' door measures 26" (.66m) wide x 62" (1.57m) tall. With no brackets or hooks attached to the entry frame, a person can move through the door without fear of catching on obstructions.

Easy Latch System

The easy latch system on the inside and outside panels allow entry without the need for any tools. The lockable outside cover secures contents and protects against unauthorized entry.

Drive-In Door

This optional door measures 7'1" (2.159 m) wide by 8'8" (2.64 m) tall and is hot-dip galvanized for superior corrosion resistance.

Chief's unique side draw design increases strength and unload speeds

Elevate your grain handling capabilities with Chief's innovative side draw system, compatible with all Chief bins. Our 10,000 BPH standard side draw is a standout in the industry, setting new benchmarks for efficiency and performance.

Key Features:

Versatility: Install side draws in all Chief bins for flexible load-out configurations.

Industry-Leading Capacity: Our 14" Spout standard side draw sets the benchmark at 10,000 bushels/hour (250 MTPH).

Structural Reinforcement: Prevent stress and wear with reinforced bin walls for extended equipment life.

Precise Grain Handling: Direct grain flow, eliminate bridging, and optimize loading with in-take openings.

Tailored Sizes: Choose from two sizes to meet your specific needs.

- 14" Spout – 10,000 BPH (250MTPH)
- 18" Spout – 20,000 BPH (500 MTPH)

Elevate your efficiency with Chief – where reliability, performance, and innovation converge!

SAFETY AND TIME-SAVING FEATURES

Stairs, ladders, platforms and safety cages

Chief offers OSHA compliant options for bin stairs, inside/outside ladders, platforms, and safety cages all in galvanized finish.

Roof stairs

Stairs with guardrails make accessing the bin's midsection and peak safer and more convenient.

Roof inspection door is accessible from eave platform

Chief offers single-tier and two-tier eave platforms. Either one will allow a person to safely remain standing while inspecting the grain through the roof inspection door.

Mid-roof and eave walkaround platforms

These platforms feature a guardrail and offer ample width for easy maneuverability, making it easier and safer to maintain the bin's (silos) openings and vents.

Safety cage options available

Ladder and cage rest platform

Foundation & side-wall decks available

V-RIB ROOF

The new V-Rib Roof from Chief Agri is the perfect solution for all your bin roofing needs. Engineered for both structured and unstructured roofs, the V-Rib panel incorporates a stair-step in the side slopes of the rib and subtle corrugations in the pan for increased strength and resistance to bending, shear, and axial loads. The grade of steel used in manufacturing the roof panels has also been increased from 33ksi to 40ksi, providing even more protection against the elements. With its larger capacity for snow, wind, and peak loads, the new V-Rib Roof is designed to protect your commodities well into the future.

Unmatched Height:

- The V-Rib Roof soars above the competition with a 4-inch rib profile, surpassing the next tallest at 3.5 inches. Its five vertical rib stiffening segments ensure superior strength.

Galvanized Finishes for Superior Protection:

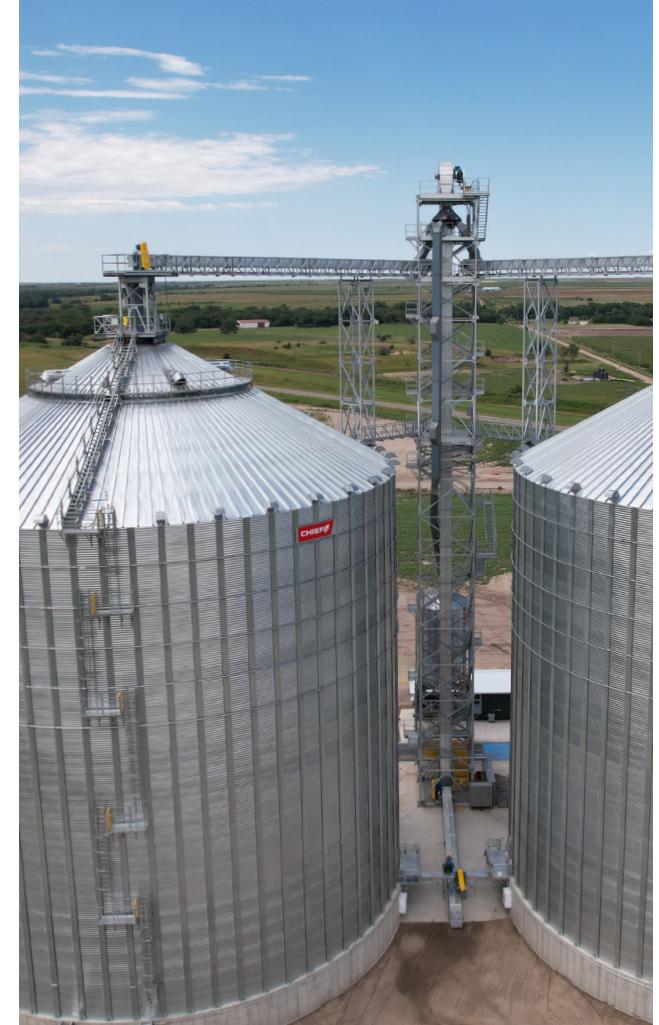

- Standard G115 galvanized finish provides robust corrosion resistance.
- Upgrade to G210 for premium durability, ideal for challenging environments.

22ga 40KSI Steel Construction:

- Crafted from resilient 22-gauge 40KSI steel, ensuring strength and flexibility.

Advantages:

- Durability: Exceptional materials and design translate to a longer lifespan.
- Weather Resistance: Resilient against corrosion, weathering, and environmental challenges.
- Ease of Installation: Effortless installation without compromising strength.

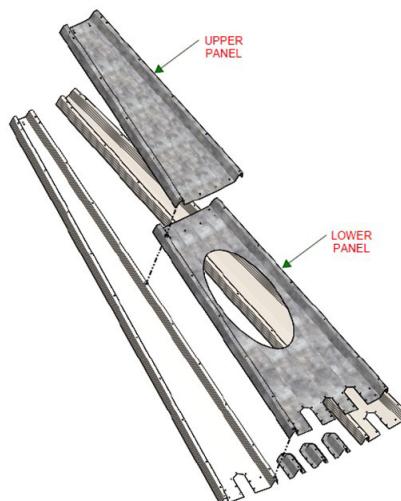

Chief Agri's V-Rib Roof combines innovative design with premium materials, providing a reliable, durable, and weather-resistant solution. Elevate your expectations with Chief Agri.

Roof Fan Panel Assembly

Key Features:

- Strategically placed roof fans optimize ventilation efficiency.
- One panel replaces two standard upper tier SVR roof panels, maximizing functionality.
- Easy installation with seamless integration for a simplified process.
- Secure fastening ensures stability using 5/16x1" bin bolts and nuts.
- Enhanced protection with additional peak rib caps.
- Weather resistant with strip sealant application.

Experience the innovation and efficiency of our Roof Fan Panel Assembly – a sophisticated solution for superior ventilation and structural integration.

WORLD CLASS DESIGN FEATURES

Vents and Roof Exhausts

Chief offers the industry's most complete exhaust line. All vents install easily and are designed to minimize build-up of ice and foreign materials. Pre-punched roof panels make installation quick and easy!

Goose Neck Vent

2670 CFM (4536 m³/h) hooded bin vent is 20% larger than standard hooded vents.

Roof Exhausters

- 18" (458mm) 4000 CFM (6796 m³/H)
 - 24" (610mm) 10650 CFM (18094 m³/H)
- Roof exhaust fans available.

Wind, snow, and seismic upgrades available

All Chief bins are designed per ASCE standards and can be upgraded to withstand the environmental loads specific to your area as needed.

Grain monitoring system

Chief Agri is a distributor of highly sophisticated grain storage monitoring products, ranging from simple handheld monitoring units to complete computer-controlled grain management systems.

FARM BINS

STIFFENED AND UNSTIFFENED

Elevate your farm with Chief Farm Bins, designed for seamless integration into commercial grain management systems. Enjoy the renowned strength, durability, and easy installation that define Chief's reputation.

Available in sizes ranging from 15'6" (4.72m) to 49'6" (15.09m) in diameter and 19'2" (5.84m) to 82'3" (25.07m) in overall height, Chief offers stiffened or unstiffened bins to suit any farm operation.

Consult with your local Chief Agri dealer to effortlessly select bins that meet your specific needs. Our expertly constructed bins will be ready when you need them, ensuring a seamless integration into your farm management strategy.

Precision engineered for outstanding performance!

COMMERCIAL BINS

At Chief Agri, we understand efficient grain storage is the backbone of a successful agricultural operation. Our Commercial Grain Storage solutions are designed with precision and innovation to meet the evolving needs of modern agriculture. With a legacy of excellence spanning decades, Chief Agri is the trusted choice for farmers and agribusinesses seeking reliability, durability, and performance.

Key Features:

Customization for Every Need:

Recognizing the diverse requirements of commercial grain storage, Chief Agri offers a range of customizable options. Whether you need large-capacity silos or a modular system for flexibility, our solutions can be tailored to your unique specifications.

Durability Beyond Compare:

Built with robust materials and precision engineering, Chief Agri's storage solutions guarantee long-lasting durability. Our structures are designed to withstand the toughest environmental conditions, providing peace of mind for farmers facing the challenges of modern agriculture.

Our standard, G115 Galvanization, ensures superior corrosion resistance. Enhance protection and longevity with the option to upgrade to G210.

Chief Advantages:

Increased Operational Efficiency:

Chief Agri's Commercial Grain Storage solutions are geared towards enhancing your operational efficiency. With features like automated loading and unloading, you can streamline your workflow, saving time and resources.

Preservation of Grain Quality:

Maintaining the quality of your harvested grain is paramount. Chief Agri's advanced storage systems ensure proper aeration and temperature control, preserving the quality of your grain and protecting your investment.

Sustainability and Cost-Effectiveness:

We prioritize sustainability by designing energy-efficient systems that reduce operational costs. Chief Agri helps you achieve a balance between productivity and environmental responsibility.

Unlocking Success: Chief Agri Dealer Testimonial

At Chief Agri, we take pride in delivering cutting-edge products that redefine the industry standard. Don't just take our word for it – hear it directly from our trusted dealers.

Why Chief Agri? Our Dealers Speak:

Discover the unparalleled quality, reliability, and innovation that Chief Agri brings to the field. Our dedicated dealers share their experiences and insights, shedding light on the transformative impact of Chief Agri products.

Testimonial Highlights:

- Unmatched Product Performance
- Dependable Support and Service
- Sustainable and Efficient Solutions

Explore a Diverse Range of Chief Commercial Bins, Precision-Crafted to Meet Your Unique Agricultural Demands!

Behind the Scenes: Chief Agri 'How It's Made' Video

Dive into the heart of Chief Agri with our 'How It's Made' video. Scan the QR code for an exclusive look at the precision and innovation shaping our agricultural solutions.

How it's Made

HOPPER TANKS

For an exceptional value Chief Commercial Hopper Tanks are the smart choice!

Commercial hopper tanks from Chief Agri offer the same ease of installation and unparalleled strength found in the Chief commercial grain bin line. Engineered from the highest quality materials, they provide the long term reliability and satisfaction you've come to expect from Chief. For wet holding, storage, or load-out, contact Chief to maximize your storage dollars.

Up to 61050 bushel capacity (1551 M Ton)

The exclusive Chief exterior "W" stiffener is almost twice as strong as the closest competing stiffener.

Sidewall sheets are G115 with 70 ksi tensile strength, same as bins.

Chief commercial hopper tanks utilize a standard powder coated or optional hot-dipped galvanized substructure with welded legs and ring beams. A "Super Structure" is available for use in drive-under applications.

G115 on sidewalls, stiffeners, and roof panels for superior corrosion resistance. Optional upgrade to G210 galvanized steel.

A 45° bottom hopper cone and a 16" (406 mm) discharge opening are standard with Chief commercial hopper tanks. 60° hopper cone available on certain models.

Up to 25,000 lbs. (11340 kg) Peak Load

One of the Highest in the Industry!

MEDIUM-DUTY HOPPER TANKS

Chief's V-rib roof design uses over 30% more ribs than leading competitors, providing a cover of exceptional strength for smaller bins without a structured roof.

- Easy to install.
- A cost-effective solution built with superior strength.
- Wide range of capacities adaptable for different applications, commodities, and more!

LEMANCO MODULAR BIN SYSTEMS

Complete Dry Bulk Storage Systems

Discover Chief Agri's Lemanco Modular Bin Systems for reliable and efficient dry bulk storage.

Modular Design: Easily expand or modify to accommodate evolving storage needs.

Durable Construction: High-quality materials ensure longevity and withstand bulk material storage demands.

Efficient Material Flow: Optimized for smooth and reliable material flow, reducing downtime.

Warehouse and Structures

Complement your storage system with Chief Agri's tailored warehouse and structure options.

Customizable Solutions: Integrate additional space for processing, packaging, or equipment.

Structural Integrity: Meet or exceed industry standards for enhanced reliability and safety.

Climate-Controlled Options: Ensure optimal conditions for specific materials.

Custom Design per Site and Customer Requirement

Get a tailored solution that fits your site and operational needs.

Site-Specific Design: Optimize for topography, space constraints, and access requirements.

Customer-Driven Solutions: Incorporate your preferences for material handling, automation, and more.

Compliance and Safety: Meet or exceed industry standards for a safe and compliant storage facility.

BIN SYSTEM

Modular bin options include 6', 7', 8', 10', and 12' (1.83 m, 2.13 m, 2.44 m, 3.05 m and 3.66 m) with half and quarter bin compartments available.

Factory welded one-piece hoppers for 6' - 10' (1.83 m - 3.05 m) require no field assembly. Optional two-piece or bolt-together hoppers are available.

Standard hoppers have 60° slope and internal corner chamfers. Chief welded hoppers do not require field assembly.

Vented galvanized man way with easy access inspection port and filter. (Shipped loose)
Conforms to NFPA 61 (Section 9.3.9.4)

Structural steel supports are designed to meet seismic categories and wind loadings per ASCE. All structural members are fully coated. A325 fasteners are included. (Chief estimates these minimum loading requirements based on tabulated values in ASCE 7-16.)

**Flexibility,
Future
Expandability!**

BIN SYSTEM OPTIONS

Standard safety equipment includes ladders, cages, platform safety gates, handrails, and optional fall arrest systems that meet OSHA requirements.

Standard suspended weigh hoppers come in 6', 7', or 8' (1.83 m, 2.13 m, 2.44 m) sizes with flare tops or header boxes/covers, including canvas connectors and vents with filters. Support frame, shafts, wheels, and drive package are provided for weigh lorries. Exterior is coated with gray enamel and interior with linseed oil.

Optional stainless steel or epoxy coated bins are available for storing corrosive bulk materials.

Standard adaptors are 2-to-1 and/or 4-to-1, welded and coated with gray enamel on exterior and linseed oil on interior.

FANS

Caldwell Fans

Safe, reliable, and attractive. With over 61 years of manufacturing experience, Caldwell fans and heaters assure system performance, dependable service, and acceptance throughout the world.

- Galvanized housings
- Motors from industry-leading manufacturers
- Available for 230, 460, or 575 volt 60 hz, and 380 volt 50 hz applications
- CSA approved, PAMI tested
- Meets OSHA standards

Behind the Scenes:

Chief Makes That: Featuring Axial Fans by Chief Agri

Scan the QR code to witness the manufacturing process in action.

Right Fan for the Right Job!

Caldwell aeration has been one of the most recognized aeration brands since its founding in 1961.

Axial Fans

Caldwell axial fans range in diameters from 12" to 28" (305 mm to 711 mm) to fit any application.

- 3500 rpm at 60 hz operation
- Single and three-phase TEAO motors ranging in horsepower from .75 to 12.5
- Heavy gauge galvanized housing built to last

Centrifugal Fans

Designed for farm and commercial use. Centrifugal fans operate quieter and allow for easy field upgrades with heaters.

- For deep grain depths, fan operation to static pressures up to 33" water column
- 1750 rpm / 3500 rpm at 60 hz and 1450 rpm / 2900 rpm at 50 hz
- Wheels from 15" to 40" (381 mm to 1016 mm) diameter
- 3 to 100 horsepower models
- Single and three-phase TEFC motors, PTO units available
- 230 volt models are pre-wired for heaters

Inline Centrifugal Fans

Compact and quiet, Caldwell inline centrifugal fans are ideal for medium to high static pressures and allow for easy field upgrades with low temperature heaters.

- Heavy gauge galvanized housings from 14" to 28" (356 mm to 711 mm)
- Wheels from 10" to 20" (254 mm to 508 mm)
- 1 to 15 horsepower models
- Single and three-phase ODP motors

HEATERS

Caldwell heaters are designed to work in combination with axial, centrifugal, or inline fans. Fueled by natural gas and liquid or vapor propane, Caldwell heaters are available in upstream and downstream models.

- Easy access service door and control enclosure
- Heavy gauge galvanized housings are built to last
- High and low temperature configurations
- Nine models of electric humidity controllers

Efficiency - Dependability

DUCTS

Caldwell offers a wide variety of grain conditioning ducts for commercial and farm use, including custom designs. Caldwell provides aeration installation layouts.

TRANSITIONS

Caldwell transitions have galvanized housings and feature an efficient design to reduce turbulence.

- Offer maximum airflow
- Shipped fully assembled for faster installation
- Form a tight, dependable seal

FLOORS

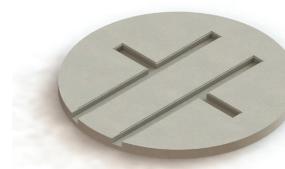

Caldwell Flush Floor Systems

Caldwell Flush Floor Systems are custom designed for each specific application. Choose from a panel grate system, corrugated sheeting system, or channellock plank system in the configuration that fits your needs. Available in a variety of sizes up to 10' (3 m) wide, systems are perforated for unrestricted air flow. Caldwell will also design a custom fit to ensure proper air flow. Panel grates are available with I-beam supports (which incorporate a perforated web) for heavier loads. Flush Floor Systems are manufactured with modular components for ease of installation.

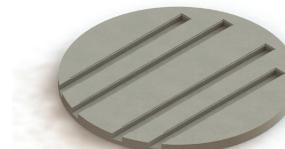

2H Flush Floor System

2T Flush Floor System

4F Flush Floor System

4I Flush Floor System

Explore More Options: Discover our Range of Flush Floor Layouts

Full Floor Systems

Caldwell channellock floor systems are manufactured to help maintain the optimum quality of your grain. All channellock floor planks are of galvanized steel and manufactured to exacting specifications to insure proper fit, structural integrity, and proper airflow.

Rigidity for the Long Haul!

Caldwell Floors are engineered to handle grain depths of up to 110' (33.52 M)!

Available floor perforation sizes per gauge:

20 gauge

0.094" (2.4 mm)
0.050" (1.3 mm)

18 gauge

0.094" (2.4 mm)
0.054" (1.4 mm)

16 gauge

0.094" (2.4 mm)

**Floor supports are available in:
Airframe design
Channellock design**

13" (33.02 cm) floor depth

17" (43.18 cm) floor depth

16 gauge galvanized material

CONVEYORS

Galvanized for superior corrosion resistance

Chief horizontal chain conveyors come standard with fully galvanized intermediate sections. It can be customized to your application.

Product Features:

- Horizontal and Incline Conveyors available.
- AR Liners in 10 ga, 7 ga, 1/4" and 3/8".
- High-strength Chains with welded attachments.
- HD UHMW CNC cut replaceable paddles.
- Class II Drives Standard; Class I & III available.
- Large variety of box sizes and chain speeds available.
- Intermediate seams have bolt connections with staggered bottoms to provide a secure joint without the need for welding. The result is a strong connection with superior corrosion resistance.
- Take-up system uses an easy to adjust threaded rod for reliable and accurate chain tensioning.
- Reversing conveyors are available.
- Idler return systems are used for smaller conveyors; rail returns are standard on 21" (53.34 cm) and wider conveyors.
- Options available for multiple discharge. Full line of inlets, and sensors.
- Legs and conveyors are also available in stainless steel.
- Capacities up to 40,000 bph (1016 MT/h).

Self-Cleaning Conveyor

Experience the efficiency of our Self-Cleaning Conveyor, meticulously crafted with specially designed formed pans to eliminate potential material buildup. The innovative paddles seamlessly sweep along the inclined surface, ensuring that no residue is left behind. This design is particularly beneficial for conveyors handling diverse commodities or feed products, providing reliable and continuous material flow to the discharge point.

Gentle Handling, Low Horsepower

Under Floor Conveyor

Engineered with exceptional strength to withstand high usage demands, our Under Floor Conveyors are available in both Horizontal and Horizontal Incline Models, offered in 17x09 and 21x09 configurations. Specifically designed to seamlessly integrate beneath a 17" floor support, these conveyors provide robust and reliable solutions for your material handling needs.

Worldwide support

Taking care of our customers is a top priority at Chief Agri. We engineer lasting relationships by offering dependable service and products built to last. But don't just take our word for it! Here's what a few of our many satisfied customers have to say:

"What impresses me most about Chief is their commitment to building relationships with their customers and getting to know their needs firsthand. It's this level of dedication that truly sets them apart and makes them an invaluable partner."

- Blue River Sales & Service

"Chief is a partner who provides support in strong economic times as well as in challenging situations. Therefore, for us, Chief is the go-to choice."

- MEPROSA

ELEVATORS

Heavy Duty Commercial Elevator Boot is Built to Last!

Standard for 36" (91.44 cm) pulleys and larger.

Available as an option on other models.

- Chief's heavy-duty boot is ideal for extra heavy operations!
For use in the largest of commercial grain handling facilities, with features to meet your demands.
- Welded and hot-dipped galvanized frame is constructed with structural angle support and 1/4" plates.
- Rack and pinion clean-out doors provide easier access for cleaning the boot.
- Side shovel pocket makes it easy to feed loose grain that may have spilled around the boot area.

Elevator Trunk Sections Install Easily!

- Ceramic and urethane lining optional, explosion vents are optional on 20'-0" (6.10 m) centers in the up and down leg trunking.
- Inspection sections have heavy-duty welded frames with removable panels for easy belt and bucket maintenance.
- Polyethylene buckets are standard. Steel, stainless steel, urethane, or nylon buckets are optional.
- Urethane-lined discharge hoppers are available for smaller models and standard on larger models.

Explosion Venting

Polyethylene Buckets

Standard Boot Sections offer Rock Solid Support!

Standard for 30" (76.20 cm) pulleys and smaller

- Inspection doors on each side of the boot section provide access to the heavy-duty drum or self-cleaning winged pulley.
- 45° clean-out sections on the end panels of each boot section are standard.
- Take-up screws are standard.
- All Boot shafts are drilled and tapped for an optional speed monitor.
- Clean-out sections are standard on each end of the boot.
- Factory precut openings for rub bar monitors.

Self Cleaning Boot

- Available in Hot Dip Galvanized Finish Or Stainless Steel
- Available in Standard Drum Or Wing Pulley Configurations
- Available 10" - 30" Pulley Diameter.

Full Capacity - Delivered!

NOTE: Bucket Elevators have a standard Left Hand (LH) projection which means from the motor mount looking towards the discharge of the elevator the drive arrangement will be on the left hand side.

CATWALKS & TOWERS

*Long Life, Professionally Engineered
Project Specific Design*

Your Catwalks and Tower Systems are manufactured by Chief Agri, whose dedication to customer service and reputation for manufacturing quality grain storage and handling systems is recognized worldwide.

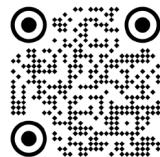

Here are a few of the reasons why Chief Catwalks and Tower Systems are right for your grain handling system:

- All components are hot-dipped galvanized
- Fully bolted assembly
- Square tubing design assures optimal strength
- Multiple catwalk models and tower widths to accommodate your grain system needs
- Available with 24" Grip Strut walkways or full-floor options
